Himanshu Raj Patel

Software Engineer
Bangalore, Karnataka, India
+91-9555330950 | himanshurajpatel138@gmail.com | LinkedIn | GitHub | Portfolio

Summary

Full-stack Software Engineer with experience building production web applications and backend services. Delivered work across REST API design, caching and performance optimization, third-party and webhook-based integrations, payments, and real-time systems, with a focus on measurable cost and latency improvements.

Experience

Krishworks Technologies and Research Labs Pvt. Ltd. **October 2025 – Present**
System Software Engineer *Bangalore, Karnataka*

- Cut Firebase read operations by 80% by introducing a Redis caching layer and reworking data access patterns, lowering database load and monthly operating cost
- Optimized game server concurrency using Redis-based coordination, reducing CPU usage by 35% and sustaining 200 concurrent multiplayer sessions (6 players each) on a single 2 GB server backed by PostgreSQL
- Built a delivery logistics management system integrating 5+ courier partners (Delhivery, DTDC, and others) behind a single internal API, normalizing divergent partner contracts for booking, cancellation, and webhook-based shipment tracking across shipments
- Designed a serviceability and dynamic tariff engine resolving pincode coverage, turnaround time (TAT), and per-partner rate cards at request time to automatically route each shipment to the cheapest viable courier
- Integrated the Meta WhatsApp Business API to push real-time shipment status and delivery updates to customers, consuming delivery-receipt webhooks to track message state and removing manual status follow-ups by the operations team
- Authored the system architecture for a real-time ballistic tracking system for the **Indian Army**, defining target assignment, event streaming, and persistence layers for low-latency hit detection and counting
- Built the CRM powering Slato, a student teaching and examination portal, with role-based access control (RBAC) and Razorpay payments to manage students and classes, author and conduct exams, and publish results and certificates

Kode Klan Pvt. Ltd. **December 2024 – October 2025**
Software Engineer *Noida, Uttar Pradesh*

- Built a national and international flight and hotel booking platform on the Travel Boutique (TBO) API, with real-time fare pricing and PayU hosted checkout, processing [[N]] bookings per month
- Developed a CRM to create, price, and manage the travel packages sold through the booking platform
- Delivered a restaurant point-of-sale system and customer-facing storefront on React.js, Node.js, and MongoDB, with multi-store support, role-based access control (RBAC), real-time order tracking, and thermal printer integration

Skills

Languages: Java, JavaScript, TypeScript
Frontend: React.js, Redux, CSS, Tailwind CSS
Backend: Node.js, Express.js, NestJS, REST APIs, Webhooks, Socket.io, JWT
Databases / ORM: MongoDB, PostgreSQL, Redis, Prisma
Integrations: Meta WhatsApp Business API, Razorpay, PayU, Stripe, Travel Boutique (TBO)
Tools: Linux, Git, Flyway

Education

JSS Academy of Technical Education **2020 – 2024**
Bachelor of Technology in Electronics and Communication Engineering *CGPA: 7.19/10*

Blue Bells Public School, Jhansi **2016 – 2020**
Secondary and Higher Secondary Education (PCM) *Class 12: 87.66%; Class 10: 86.33%*

Leadership and Extracurricular Activities

- Event Coordinator: Organized dance and art competitions for a college fest with 500+ participants
- Cross-functional Team Leader: Managed teams of artists, performers, and volunteers across event activities
- Dance Society Coordinator: Core member of VERVE; led rehearsals, performances, and workshops
